## Revision History

Version	Date	Revision Description
0.1	07.10.2014	Initial document
0.2	14.10.2014	Transfer to LaTeX
0.3	25.10.2014	Redundant requirements removed, stakeholder added, use cases updated

# 1 Introduction

## 1.1 Purpose

This document is the Software Requirements Specification for the ESE 2014 apartment- and shared room search platform project. This software aims to provide a practical and easy to use environment for searching for apartments and shared rooms, as well as placing advertisements for such.

This document is meant for our customer and us, the development team, to deliver a common base and detailed description of all the criteria the software should meet in the end.

## 1.2 Stakeholders

Bledar Aga, ESE Team 7, students looking for a room to rent

## 1.3 Definitions

**Searcher:** A person who wants to find a room in a shared apartment.

**Provider:** A person who wants to find a person for a room in his/her apartment.

## 1.4 System Overview

The purpose is to provide a system where a Searcher can find a shared apartment and a Provider can place an ad for a shared apartment.

Our goal is to out beat the market with further methods for scheduling an appointment for visiting a shared apartment.

## 1.5 References

Concerning main functionalities, such as placing an ad and searching for an apartment or shared room, we will take these following websites as examples:

- [www.wgzimmer.ch](http://www.wgzimmer.ch)
- [www.students.ch/wohnen/](http://www.students.ch/wohnen/)
- [www.tutti.ch/ganze-schweiz/immobilien/wg-zimmer](http://www.tutti.ch/ganze-schweiz/immobilien/wg-zimmer)

We will analyze their features and behavior to filter out good practice and improve their weaknesses.

## 2 Overall Description

### 2.1 Use Cases

#### 1. Send Enquiry For interesting Apartment

##### 1.1. Actors

Searcher

##### 1.2. Description

As a searcher I want to search for a shared apartment, bookmark different options and send enquiries to a provider and schedule appointments with the provider.

##### 1.3. Trigger

Searcher sends enquiry to provider.

##### 1.4. Pre-conditions

There are apartment ads placed by providers

##### 1.5. Post-conditions

Provider receives enquiry and a notification

##### 1.6. Main Scenario

Provider places an ad

Searchers searches and finds ad

Searchers send an enquiry

Provider checks enquiry

##### 1.7. Alternative Scenarios

None.

##### 1.8. Special Requirements

##### 1.9. Notes

## 2. Schedule Meetings

### 2.1. Actors

Provider

### 2.2. Description

As a provider I want to make an ad of my shared apartment, answer to enquiries, rank searchers and schedule appointments with the searcher

### 2.3. Trigger

User checks enquiry inbox.

### 2.4. Pre-conditions

At least one enquiry in inbox.

### 2.5. Post-conditions

Provider schedules an appointment with the searcher or declines enquiry.

### 2.6. Main Scenario

Searcher checks enquiry inbox

One ore more enquiries available

Provider accepts enquiry

Searchers and Provider schedule appointment

After successful interaction the ad is deleted.

### 2.7. Alternative Scenarios

Searcher checks enquiry inbox

One ore more enquiries available

Provider declines enquiry

Enquiry is deleted from inbox

Searcher checks enquiry inbox

No enquiries available

Page shows message "No enquiries pending"

### 2.8. Special Requirements

### 2.9. Notes

## 3. Register

### 3.1. **Actors**

Searcher  
Provider

### 3.2. **Description**

As a user, I want to create a personal user account.

### 3.3. **Trigger**

User registers

### 3.4. **Pre-conditions**

Required information (valid e-mail, Name, Address, etc.) is complete

### 3.5. **Post-conditions**

User account is created, user is redirected to a relevant page.

### 3.6. **Main Scenario**

User opens registration page  
User fills form and hits send button  
User gets to relevant page

### 3.7. **Alternative Scenarios**

User doesn't fill in all required fields  
User hits send button  
Required, empty (or invalid) fields are marked  
User enters missing information  
User gets to relevant page

### 3.8. **Special Requirements**

### 3.9. **Notes**

## 4. **Login and forgotten password**

### 4.1. **Actors**

Searcher  
Provider

### 4.2. **Description**

As a user I want to log in the system to set my profile settings and organize

enquiries.

**4.3. Trigger**

User logs in

**4.4. Pre-conditions**

There is a valid profile to log in to

**4.5. Post-conditions**

User is able to organize enquiries or set/edit profile information.

**4.6. Main Scenario**

User opens login page

User fills form and logs in

User gets to relevant page

**4.7. Alternative Scenarios**

User forgot password

User needs to enter correct Email address

User gets Email with reactivation code

User logs in with reactivation code and sets up new password

User gets to his profile page

**4.8. Special Requirements**

**4.9. Notes**

**5. Search For Apartment**

**5.1. Actors**

Searcher

**5.2. Description**

The Searcher, an user that searches for certain types of shared apartments finds ads that match his search

**5.3. Trigger**

Searcher fills in Search Form and Submits

#### 5.4. **Pre-conditions**

There are ads placed that can be browsed.

#### 5.5. **Post-conditions**

Ads that match the search criteria are shown and ready to check out.

#### 5.6. **Main Scenario**

Searcher opens search page  
Fills in his relevant criteria  
Clicks on "Search"  
Is shown relevant ads

#### 5.7. **Alternative Scenarios**

#### 5.8. **Special Requirements**

#### 5.9. **Notes**

When no relevant ads exist, the search page is shown, with a message "No ads found matching your criteria".

### 6. **Save Search Criteria**

#### 6.1. **Actors**

Searcher

#### 6.2. **Description**

As a searcher I want to be informed about new ads that are relevant to pre-edited search criteria

#### 6.3. **Trigger**

New ad that matches Searcher profiles search criteria is placed

#### 6.4. **Pre-conditions**

Searcher has set up his search criteria

#### 6.5. **Post-conditions**

Email is sent to Searcher that a new relevant ad has been placed

#### 6.6. **Main Scenario**

Provider posts for a certain Searcher relevant ad

Searcher gets informed by Email that a new promising ad has been placed.

#### **6.7. Alternative Scenarios**

#### **6.8. Special Requirements**

#### **6.9. Notes**

### **7. Bookmark ads**

#### **7.1. Actors**

Searcher

#### **7.2. Description**

As a Searcher I want to save certain ads to a personal list

#### **7.3. Trigger**

Searcher finds an ad he wants to be informed about

#### **7.4. Pre-conditions**

There are ads

#### **7.5. Post-conditions**

Searcher has a bookmark list with relevant ads he wants to be informed about

#### **7.6. Main Scenario**

Searcher finds interesting ad

Searcher adds ad to his bookmark list

#### **7.7. Alternative Scenarios**

#### **7.8. Special Requirements**

#### **7.9. Notes**

### **8. Place Ad and Auto Delete after certain period**

#### **8.1. Actors**

Provider

#### **8.2. Description**

As a provider I want to place an ad and manage the period of placement

**8.3. Trigger**

Provider fills in form for ad and submits the form

**8.4. Pre-conditions**

An end date of the ad placement is submitted in the form

**8.5. Post-conditions**

Valid ads are kept in the system

**8.6. Main Scenario**

Provider fills in ad form Provider submits form Ad is placed One week before ad placement end the provider is informed via Email Provider deletes ad or changes end date

**8.7. Alternative Scenarios**

Provider fills in ad form Provider submits form Ad is placed One week before ad placement end the provider is informed via Email Provider doesn't react to Email Ad goes inactive

**8.8. Special Requirements**

**8.9. Notes**

**9. Personally Rate Candidates**

**9.1. Actors**

Provider

**9.2. Description**

As a provider I want to rate interesting candidates (Searchers)

**9.3. Trigger**

Provider accepts enquiry of a searcher

**9.4. Pre-conditions**

The searcher has sent an enquiry

**9.5. Post-conditions**

The provider has a list with ranked interesting candidates

**9.6. Main Scenario**

A Searcher sends an enquiry

Provider Accepts

Provider ranks Searcher

### 9.7. **Alternative Scenarios**

None

### 9.8. **Special Requirements**

### 9.9. **Notes**

## 10. **Edit Profile**

### 10.1. **Actors**

Searcher

Provider

### 10.2. **Description**

User logs in and is able to edit or update his or her profile.

### 10.3. **Trigger**

User logs in.

### 10.4. **Pre-conditions**

There is a valid profile for said user

### 10.5. **Post-conditions**

The profile edits or updates are saved

### 10.6. **Main Scenario**

The User gets to his profile page

The user gets into editing mode of the profile information's

The user saves the changes

### 10.7. **Alternative Scenarios**

The user gets to his profile page

Edits profile

Closes without saving

No changes are saved

### 10.8. **Special Requirements**

### 10.9. **Notes**

## 3 Specific Requirements

### 3.1 Functional Requirements

- The ad content has certain limits (Description letter limit, Pictures size limit).  
The ad form has some spaces that cannot be left empty.
- Users have a login, where they get to organize enquiries, rankings and bookmarks.
- Searcher gets informed when new ads are placed that matches his set up search
- Social Media linkable
- Possibility to buy a better ranking

### 3.2 Non-Functional Requirements

- The system delivers a UI that makes the main features easily accessible to every user with basic PC experience, with no need for further training.  
The application is usable on all platforms and display sizes because responsive webdesign is used (twitter bootstrap).
- The performance is good enough to make mobile usage possible.
- The user data is kept confidential and not passed on to third parties.
- The usage of the application is completely free of charge for both the provider and the searcher.
- The most frequently used features (such as bookmarking an object while looking at its profile) are accessible by just one click.
- Both database structure and usage are designed to ensure data consistency.
